DETAILED ACTION

Status of The Claims

Claims 1 and 2 have been amended. Claims 14 and 15 have been canceled. Currently claims 1 to 13 are under Examination.

Allowance

The following is an examiner's statement of reasons for allowance: Applicant claims:

- In claims 1-13, a process for the preparation of N-acyl derivatives of the formula 1, as described in claim 1. The claimed process comprises reacting a carboxamide with a glyoxal monoacetal in the presence of a carboxylic acid, as described in the said claims.

No prior art disclosing or suggesting the instant process was found. The closest art relevant to the instant invention was found in Plaquevent et al, New J. Chem., 1991, vol. 15, pp 579-585.

Plaquevent discloses a process for the preparation of peptides. Nonetheless, Plaquevent method is different from the instant invention because it is require the preparation of imines derivatives, which are converted to oxaziridines as intermediate. Plaquevent's method do not required the reaction of a carboxamide with a glyoxal monoacetal in the presence of a carboxylic acid.

CONCLUSION

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee.

Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
